

THE LORE

HARRY PEPE

◦ Sprato Pepes PFPs, a derivative of Sprato Grenlims were born on the Ethereum chain on August 19, 2023.

◦ OpenSea deemed them too similar to Gremlins and as a result they were banned from the platform.

◦ and so the full body ai versions were created to replace the PFPs.

<https://opensea.io/collection/sproto-pepes>

◦ and the dev offered a free mint Sproto Gen and Sproto PFP variation to holders.

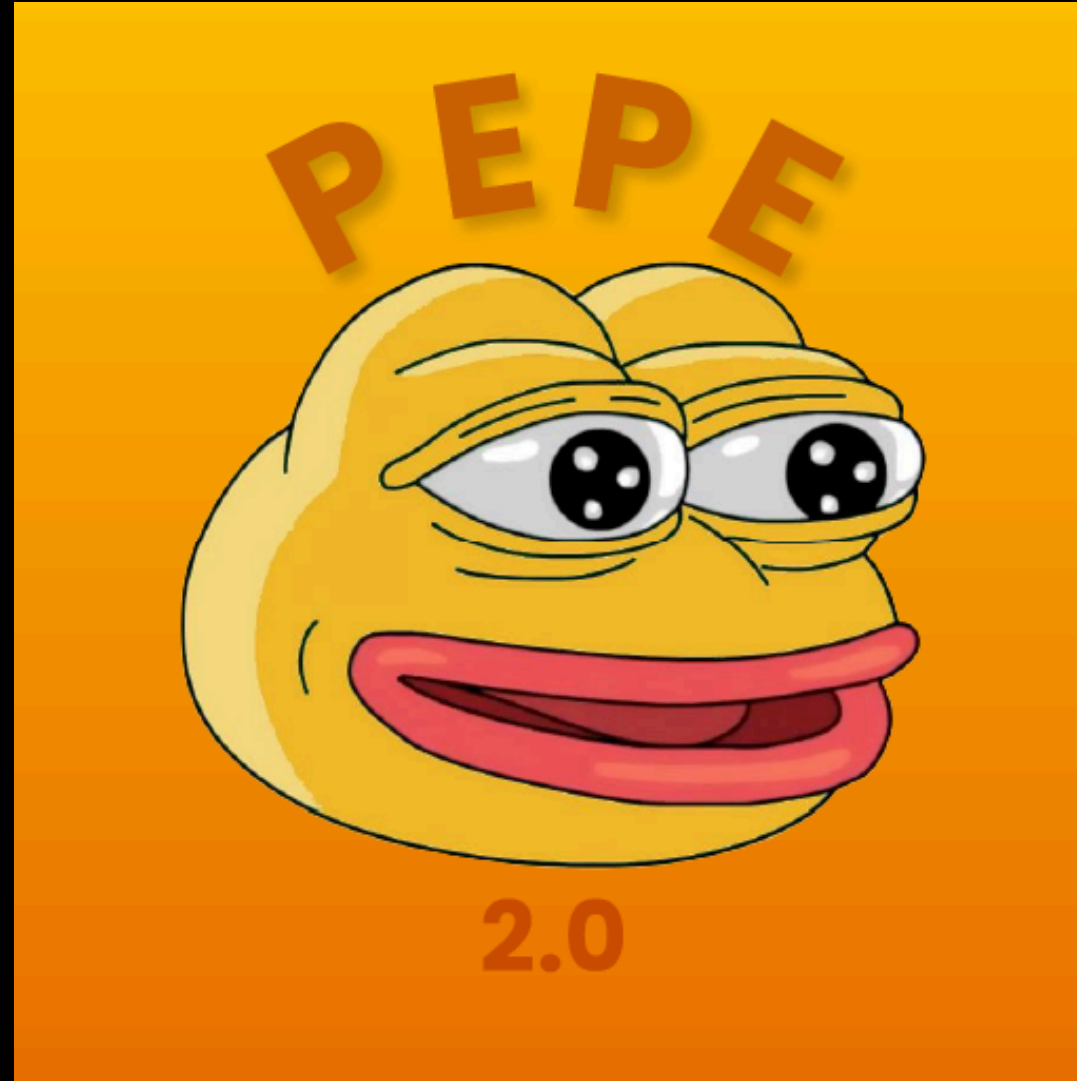

<https://etherscan.io/address/0x0b03420a8>

◦ On August 14th, 2023 the Legend of Harry Pepe, the coin, was dropped on the Ethereum chain.

◦ Beeple posted a daily including Sprouto Pepes which helped in sending the floor UP and the coin to a \$1.3 million market cap.

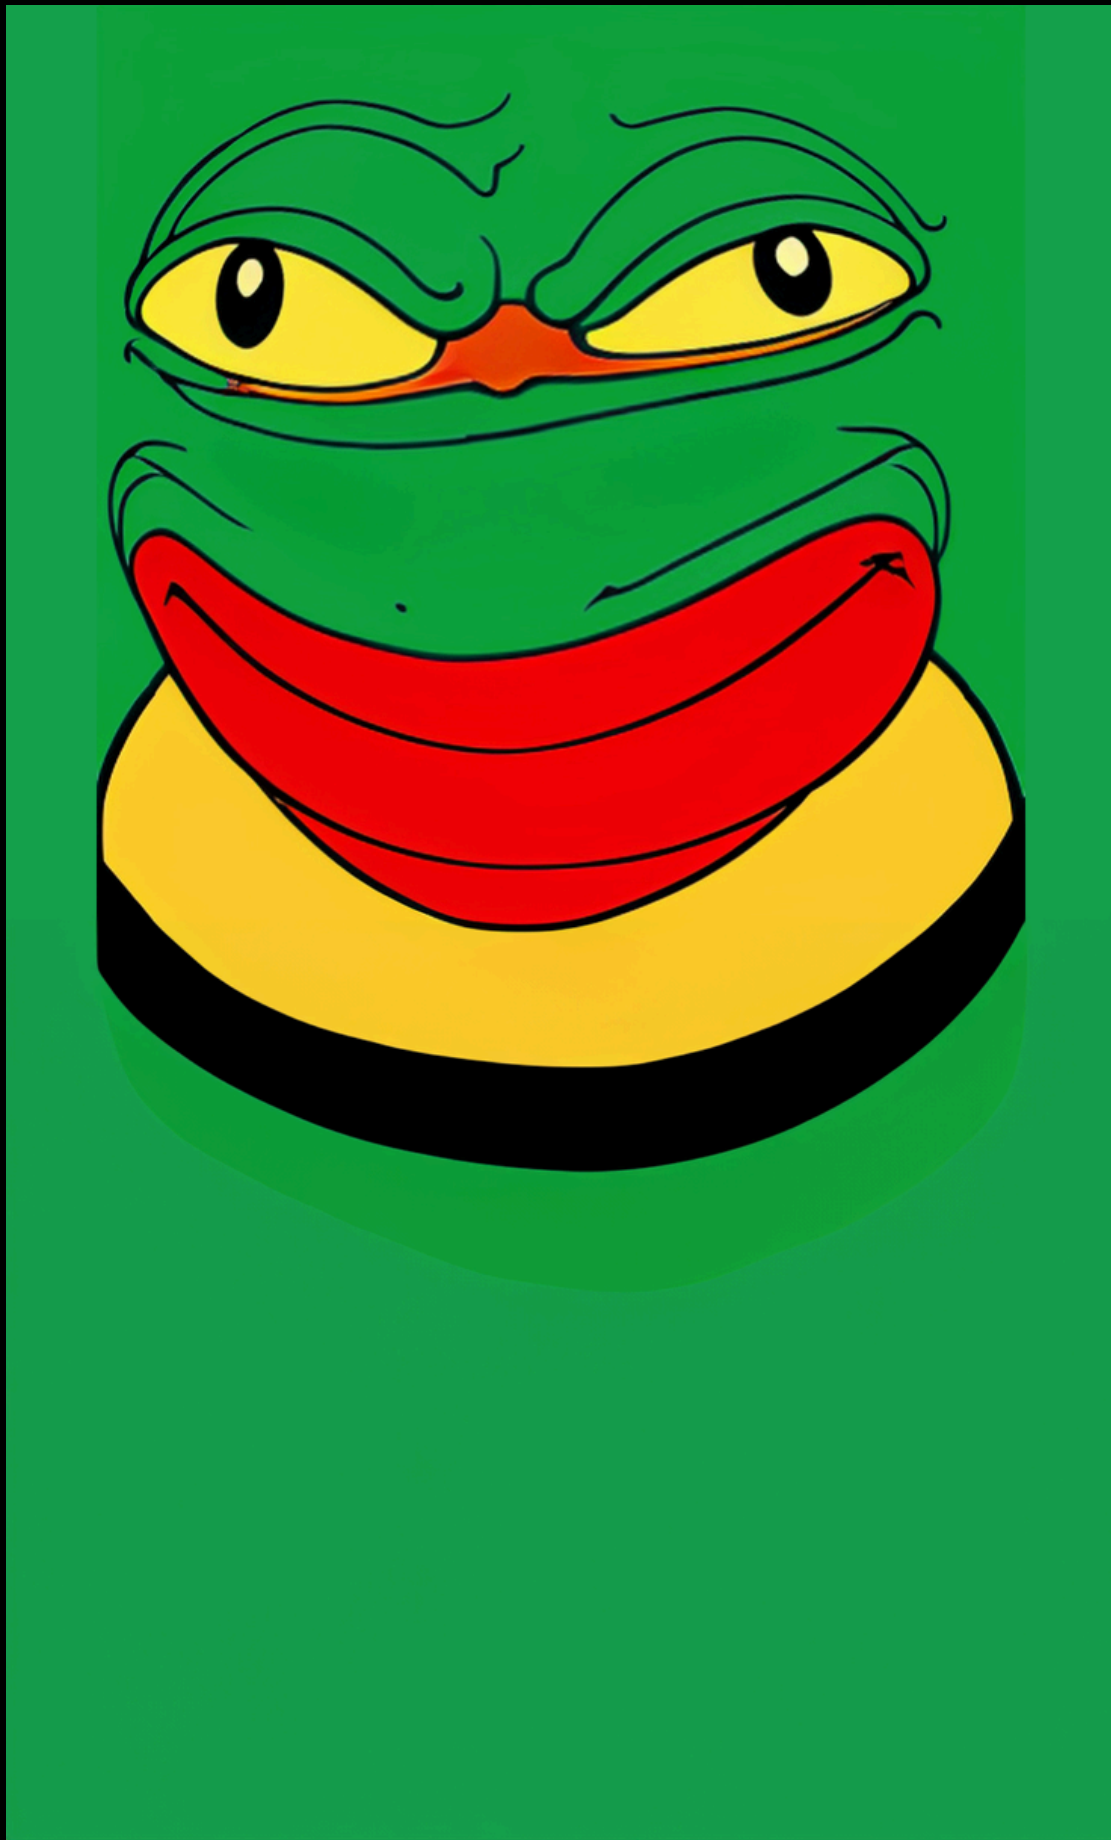

The crack addicted dev would go on to use the marketing funds to gamble the top of Pepe 2.0 and alienated the budding community.

The dev abandoned the project and the community would follow. Only a small group remained for the better part of a year.

After a long, dry, bearish winter, a small group banded together and launched a new coin on pump.fun via the Solana chain.

And the Legend lived on.
